

Assignment 2 : Luis Monzon

Creating a new VM for Ubuntu first:

← Create Virtual Machine

Name and operating system

Please choose a descriptive name and destination folder for the new virtual machine and select the type of operating system you intend to install on it. The name you choose will be used throughout VirtualBox to identify this machine.

Name:

Machine Folder:

Type: 

Version:

← Create Virtual Hard Disk

Hard disk file type

Please choose the type of file that you would like to use for the new virtual hard disk. If you do not need to use it with other virtualization software you can leave this setting unchanged.

- ☐ VDI (VirtualBox Disk Image)
- ☒ VHD (Virtual Hard Disk)
- ☐ VMDK (Virtual Machine Disk)

← Create Virtual Hard Disk

File location and size

Please type the name of the new virtual hard disk file into the box below or click on the folder icon to select a different folder to create the file in.

Select the size of the virtual hard disk in megabytes. This size is the limit on the amount of file data that a virtual machine will be able to store on the hard disk.

Create

Cancel

I cant follow with the installation, because its said that i dont have a ROOT file.

Hola Sergio, no entiendo muy bien mi problema. La primera vez que instale la VirtualBox, no me detectaba los periféricos del Pc. Tuve que desinstalarlo todo y empezar de nuevo, pude hacer el 1. Pero después la instalación de Ubuntu se me quedaba parada y no he podido seguir con el ejercicio 2.
